

HiCell

Autolysed yeast coming from selected *Saccharomyces cerevisiae* strain which contains nutritional ingredients important for growth, development and immunity of the animal.

The Functional Feed Additive

➤ **Nucleotides** - ideal for young animals boosting gut development and immunity

➤ Contains **amino acids, peptides and B vitamins**

➤ **MOS** - functional prebiotic for gut health - bacterial agglutination and immunity

➤ **1,3-1,6 Beta-glucans** - for immunity

Recommended dose of HiCell

Piglets: as add on at 5 kg per ton of feed

- less diarrhea, uniform piglets
- higher feed intake
- improved growth, continuing contributions to finisher

Lactating sows: 100 -150 g per sow per day (about one small plastic disposable cup

- higher feed intake
- more milk production
- heavier weaned litter size
- shorter open days for sows

Broiler/layer starter or pre-starter: 2-5 kg/MT

- better pellet quality (less fine)
- higher feed intake
- improved growth performance
- higher body weight for laying pullets

Aqua feed: as an add on at 2-10 kg/ton of feed

- higher feed intake
- better gut health
- improved growth performance
- stronger resistance to vibrio bacteria, virus, etc
- stress reduction
- Lesser mortality and disease challenges

Packaging:
20kg/bag
